

Comparison of the Total Revenue for Industry Sector In Year 1 and 4?

- The total revenue of the industry sectors was higher in Year 4 compared to Year 1.
- This indicates an mean of 15 billion dollars for the industrial sector in the first year, compared to an increase in the fourth year, which amounted to 16 billion dollars.
- The range for the industrial sector reached 92 billion in the fourth year compared to the first year, which reached 85 billion, a difference of approximately 7%. It appears that fourth-year companies have a more significant variance in their total revenues because their scope is more widespread.
- The standard deviation of total revenue in the fourth year (\$17,799,055,500,636) was higher than the standard deviation of total revenue for the first year (\$1738117774723). There is a higher variance in total revenues in the fourth year compared to the first year.
